

Biomedical Engineering Summer Course 2023

Ana Clara from Brazil

The exchange experience was extremely important for me, perhaps not so much related to the academic part, but 100% to the personal part. Meeting new people from cultures extremely different from mine made me really realize how big and diverse the world is.

The period in Wilhelmshaven even made me consider which professional path I want to follow in my life... (off topic, the possibility of returning to Jade for the master's degree is still very strong in my mind).

I would like to thank you for the opportunity, hospitality, patience with the different situations that occurred (I promise that next time there will be no lost baggage, I'm going to Germany by train hahaha) and all the fun moments with the staff at the International Office.
