

This experience was amazing and exceeded all my expectations.

From the classes with incredible teachers and unique methods to the friendships made and strengthened, everything was perfect.

Without a doubt, this opportunity added a lot to my personal side, giving me contact with a culture completely different from mine, and also contributed to my professional side as I was able to acquire a lot of interesting technical knowledge in the area of biomedical engineering.

The photos describe just a little of all the emotion, adventures, laughter, and learning that this exchange provided.
